

BreezeLock[®] Endotracheal Tube Holder

The Dale BreezeLock Endotracheal Tube Holder provides reliable stabilization of endotracheal tubes (sizes 7.0-10.0mm) following intubation. It can be used in supine or prone position.

Adhesive Base

Placement options for the Adhesive Base allow ability to adjust to fit patients comfortable and securely.

Tube Track

- ◆ Slide allows easy repositioning of ET tube placement.
- ◆ Allows easy access for oral care.
- ◆ Prevents kinking or flattening of tube.
- ◆ Minimizes unintentional ET tube movement and helps prevent accidental extubation.

- ◆ Easily modified and simple to apply.
- ◆ Gentle on delicate skin with no irritating-to-remove residue.
- ◆ Secures neckband to patient's face.
- ◆ Can be left in place for up to 3 days.
- ◆ Not made with natural rubber latex.
