

THE WORLD'S FIRST STRETCHER INTEGRATED SLIDE SHEET.

Stretcher Compatibility

STRYKER MODELS

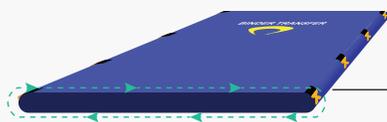

- Pro XT
- Pro 2

FERNO MODELS

- X1
- X2
- iNX

How It Works

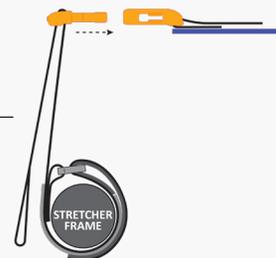

TUBULAR SLIDE SHEET

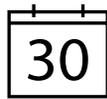

While buckled to the anchors, the slide sheet stays firmly in place. Once released, it glides smoothly for effortless transfers.

ANCHORS

The anchors firmly secure to the stretcher's frame and connect to the slide sheet with quick-release buckle.

Why should you choose the Binder Transfer?

Transferring a 105-lb patient via bedsheet alone applies up to 1,706 lbs of compressive force on your spine

Over the past 20 years, the US citizen obesity rate increased by **200%**

1 in 2 (**47%**) EMS providers have sustained an on-the-job back injury

The Binder Transfer Difference

EASIER

FOR YOU

Unbuckle, glide, and go. The Binder Transfer makes patient transfers smooth, safe, and effortless.

BETTER

FOR THEM

In place before you need it, the Binder Transfer lets you skip the log rolling and repositioning required with traditional transfer aids.

SAFER

FOR EVERYONE

No more lost or forgotten gear. Stretcher attachment boosts crew adoption of injury reducing equipment.

“This product is quite impressive. Everyone that has used the Binder Transfer has had to pick their jaw off the ground before speaking.”

- Adam Bostick, Pafford EMS
