

T-POD

Trauma Pelvic Binder

TGA: ARTG Entry - 521710
Stock Code: EME-100-001

The T-POD Responder Pelvic Binder provides a reliable and highly effective solution for the management of pelvic trauma, pain and haemorrhage, supporting improved patient outcomes by reducing associated morbidity and mortality. Featuring a circumferential adjustment system, the T-POD R is the only external pelvic stabilisation device independently validated in clinical studies to deliver stabilisation results comparable to surgical intervention.

The pulley system enables fast, effortless circumferential compression, allowing pelvic stabilisation within seconds — even in high-pressure emergency settings.

Independently proven to achieve definitive stabilisation in the reduction of pubic diastasis, comparable to surgical fixation.

The wide pulley system delivers balanced, symmetrical compression around the pelvis for optimal fracture reduction and haemorrhage control.
