

68 SERIES BARIATRIC RECLINER

Luxe and stylish, the Ascent II recliner puts a new twist on serious medical seating. The curved top-line of the seatback offers additional headroom while the “wing-back” design adds style and customization options for designers. Standard features, like swing-away arms and a removable seat, aid in meeting infection control goals. The Ascent II is optimal for patient rooms, oncology, infusion therapies, dialysis, pre- and post-operation and other treatment needs.
