HI-D BIG STICK SUCTION TIP

The SSCOR Hi-D Big Stick Suction Tip aims to combat the most common complaint for those using suction equipment for resuscitation procedures... clogged tips.

SKU: SCR.44241

QUICKDRAW® PORTABLE SUCTION UNIT

Combining the convenience of handheld suction with the performance of powered suction. The most efficient suction pump you have ever held in your hand. At only 1.2 kg, the SSCOR Quickdraw® is more efficient than the most powerful traditional suction units. It is compact and light enough to fit in an airway bag and be readily transported to the patient's side on every call.

Available in both rechargeable and battery operated variations

SKU: SCR.2403-230

TRACHEOSTOMY TUBE HOLDER

SKU: DA.240

ENDOTRACHEAL TUBE HOLDER

SKU: DA.273

WRASFER™ TRANSFER SHEET

The WRASFER™ Patient Transfer wrap sheet is designed for swiftly and hygienically transporting immobile or injured patients in high-pressure emergency situations. WRASFER™ disposable patient wrap and transfer sheet is designed for use in paramedic services, hospital emergency wards and operating theatres, in situations where fluids need to be easily absorbed.

With a fluid absorption capacity of 5 litres and a max. carrying weight of 200 KG, WRASFER™ is an extremely versatile product. It addresses four critical issues: contamination control, cleaning time/ costs, ambulance turnaround times, and patient transfer.

SKU: WRASFER

CATHETER HOLDER ADHESIVE PATCH

The Hold-n-Place Adhesive Patch is a skin friendly, breathable adhesive device, versatile enough for all of your indwelling Foley securement needs. The adhesive patch, with a skin-friendly adhesive base, is ideal for short-term catheterized patients.

All Hold-n-Place Foley Catheter Holders feature a locking systems that securely anchor the catheter in place, reducing the risk of urethral erosion, bladder spasms and trauma. The locking devices speed up application and simplify adjustment. The holders can be used with equal effectiveness on all Foley catheters including Teflon, silver and silicone coated catheters.

SKU: DA.150

CATHETER HOLDER LEG BAND

The Leg Band, made entirely of stretch material, has a soft, supple backing for added skin comfort. The elasticity and 2" width of the leg band distribute compression evenly around the high to minimize circumferential pressure.

SKU: DA.316

BENDABLE IV ARMBOARD

The Bendable ArmBoard is a simple, cost effective, tapeless, means to position and secure the wrist to prevent unwanted movement when using arterial and peripheral (intravenous) lines. The ArmBoard is covered in a soft comfortable material and is fastened to the arm with adjustable hook and loop straps. The ArmBoard can be custom shaped to any position.

It can be used in the Operating Room, Recovery Room, ICU, Patient Care Units, and more.

SKU: DA.650

IV ARMOR

Midmed's IV-ARMOR minimizes downstream occlusions while enabling patient movement. The flexible protective overlay is the ideal way to maximize IV patency while protecting the site from patient tampering. It has several benefits including reducing the introduction of infection associated with IV reinsertion, and reducing downstream occlusion alarms. The IV-ARMOR also reduces risk of catheter kinking in a bend such as a wrist or elbow, and reduces risk of catheter movement in an area of bony prominence, such as back of hand or forearm. IV-ARMOR uses skin-friendly adhesive, and comes in a one size fits most box of 10.

SKU: DA.675

TRACHEOSTOMY TUBE HOLDER

SKU: DA.240

ENDOTRACHEAL TUBE HOLDER

SKU: DA.273

LEO MINOR LED LIGHT

Design innovation meets the latest advancements in LED lighting technology in the Leo Minor® multipurpose LED surgical light. The Leo Minor features a unique patented optical solutions that produces a uniform and homogeneous light pattern with excellent shadow dilution and control. When you combine these features with daylight-like colour rendering and colour temperature, the end result is a true surgical light performance meeting or exceeding IEC requirements.

SKU: SU.LMI-

SL430 LED MINOR SURGICAL LIGHT

The Daray SL430 LED minor surgical light is specifically designed for minor procedures under local anaesthetic in health centres, GP surgeries and outpatient departments. It is ideal for minor surgery, maxillofacial, obstetrics, diagnostics and gynaecology as well as for use within casualty departments and intensive care units. This light is consistent, accurate and cost effective. With great shadow reduction and accurate colour rendering, it is an invaluable tool.

SKU: D.SL430LC

TRI-STAR LED

The Sunnex Tri-Star LED light is excellent for minor surgical and examination applications. The cool, bright light can be easily directed where needed and the caster base allows for easy portability. This light is ideal for medical procedures in environments where space is limited. Additionally, with the telescoping pole, height adjustment in the mobile configuration is possible. Wall configuration offers extensive reach with the innovative arm design. Ideal for outpatient surgery centers, examination and emergency rooms and veterinarian surgical suites.

CELESTIAL STAR LED

SKU: SU.CS2050

X340 LED EXAMINATION LIGHT

The Daray X340 examination light is specifically designed for use during medical consultation and for diagnosis. Featuring a wide range of mount options, it ensures excellent placement options. The smooth spring balanced arm and telescopic ceiling tube makes this light extremely versatile. It has an intense beam and excellent colour rendering properties. This light has a low cost of ownership and around 50,000 hours of life, equating to approximately 25 years of clinical use. Requires minimal maintenance.

SKU: D.X340

X200 LED EXAMINATION LIGHT

The Daray X200 examination light range is perfectly suited for use during medical consultations and for diagnosis. With LED technology, this light range provides an intense beam with excellent colour rendering properties. The range has a low total ownership cost and around 50, 000 hours of life, equating to approximately 25 years of clinical use. It features a fully enclosed BioProtect head to assist with the management of infection control. Minimal maintenance is required.

SKU: D.X200

X700 LED EXAMINATION LIGHT

The Daray X700 light range are premium quality, powerful and incredibly flexible examination lights, featuring variable colour adjustment. The range is available with a wide range of mount options to ensure your light is exactly where you need it. Additionally, there are two arm options – flexible gooseneck or spring-balanced arm – and a large range of hardwired and plug-top mount options to suit all clinical needs. They have a low cost ownership and around 50,000 hours of life, equating to approximately 25 years of clinical use. These lights are ideal for GP surgeries and clinics where flexibility and performance are crucial.

SKU: D.X740

X400 LED EXAMINATION LIGHT

The Daray X400 examination light is a premium quality, extremely efficient general examination light. With a large diameter light-patch, this light provides excellent illumination. Single-handed lighting control, on/off and variable intensity, can all be controlled from a single switch located next to the light head. A fully enclosed light head and arm system assists with the management of infection control. Available as ceiling, wall and mobile models, this product is a perfect complement to any examination room.

SKU: D.X400

SL180 LED MINOR SURGICAL LIGHT

The Daray SL180 LED minor surgical light features a strong beam of light that has an even intensity across the viewing area. With various mounting options, this light is ideal for gynaecology, A&E departments, day surgery, GP treatment rooms, podiatry, dermatology and other clinical practices. It has variable light intensity and around 50,000 hours of life, equating to approximately 25 years of clinical use. BioProtect anti-microbial solution coats all painted finishes, assisting in infection control. This light is a great complement to any treatment room.

SKU: D.SL180

SL720 LED MINOR SURGICAL LIGHT

The Daray SL720 LED minor surgical light is the newest addition to the range of minor procedure lighting. It is suitable for multiple minor surgical environments including health centres, GP surgeries and maxillofacial departments, as well as within casualty or intensive care. Designed for use in minor procedures, the SL720 provides clean, accurate light where it's needed. Featuring variable colour temperature, it is incredibly versatile and easily adapted to suit your specific needs. The wall and ceiling editions of this light come on spring balanced arms with a large range of movement as standard. This, combined with shadow reduction technology and low running costs, make this light a smart choice for your clinic.
