

SIZEWISE™: Sapphire 1100™

- Domestic high strength mattress construction for longevity
- Dual modes of therapy, static low air loss & alternating low air loss
- Lockout to eliminate unintentional setting change
- Alternating cycle time is adjustable from 3 to 20 minutes
- Fowler feature for seat inflation when head is elevated
- Low pressure/power failure audible and visual alarms

REAL THERAPY for REAL PEOPLE™

The **Sapphire 1100™** combines true low air loss with a unique 1 in 3 Alternation in a complete mattress replacement system.

The Sapphire 1100 is a domestic mattress that features high strength air cells, which are vented to provide true low air loss therapy. This therapy helps keep the patient dry and comfortable whether in alternation or static modes of operation. The air cells rest on a 5cm covered foam safety pad for added patient protection during power outages or patient transfer. This foam safety pad is covered with a waterproof material to eliminate cross contamination of bodily fluids. The quilted top cover is waterproof, highly vapor permeable and completely machine washable. The entire system is portable and fits on most standard medical bed frames.

The microprocessor controlled blower unit features a unique 1 in 3 alternating true low air loss therapy. The alternating cycle time can be adjusted from 3 to 20 minutes in increments of one minute. Additional features include: “Static” for stationary low-air-loss therapy, “Fowler” to boost seat inflation when the head is elevated, “Auto Firm” for rapid inflation and easy patient transfer, “Lockout” to maintain caregiver settings without accidental interruptions, “Low Pressure” and “Power Failure” audible / visual alarms, and “Self Diagnostic Check” to quickly assess all switches and sensors for proper calibration and operation.
