

INNOVATION IN COMBAT CASUALTY CARE

Multifunctional straps

Lightweight

Detachable, high abrasion skid sheet

Innovative casualty securing system

Duraelite fabric

Modular components

The **Xtract[®]SR** is designed for personnel who evacuate seriously injured casualties from hostile environments.

LIGHTWEIGHT - **Xtract[®]SR** weighs just 3kg (6.6lbs) allowing for quick and efficient transportation

MODULAR - a system that gives the operator control of configuration and selection

ADAPTABLE - A stretcher that is designed to fit casualties of all heights and compromised anatomy

ENHANCED PATIENT CARE - Cocooned in **Xtract[®]SR**, your casualty is secure and insulated

COMPONENTS

XTRACT[®]SR Stretcher
XTRACT[®]SR Base
XTRACT[®]SR Bag
XTRACT[®] Straps

Xtract®SR is designed for rescue personnel who care for seriously injured casualties within hostile environments. **Xtract®SR** gives the operator a modular approach which can be configured depending on your operational parameters.

Enhanced patient care is at the forefront of our extraction device, providing a platform that will cocoon your casualty and reduce movement, helping to protect critical interventions and reduce secondary injury. Your casualty will be secure, well insulated and ready to transfer to a safe location using drag, lift or hands-free techniques.

“Rapid casualty extraction often becomes the key link in the chain of survival.”

Dr. John Hall MB CHB, DRCOG, DFSRH, DIMC RCS ED

MEETING OPERATIONAL REQUIREMENTS

MADE TO SURVIVE

Developed specifically for our **Xtract®** range of stretchers, Duraelite is a lightweight, high abrasion and tear resistant fabric.

A detachable and replaceable insulated skid sheet allows for an extended drag extraction while considering your casualties need for insulation, comfort and protection.

PUTTING CARE FIRST

Casualties repeatedly tell us that the feeling of security during evacuation is critical to their care. **Xtract®SR** uses unique systems to ensure this priority is addressed.

Bungee straps and wide entry karabinas allow for quick securing without clogging or breaking. Respiration remains unrestricted due to the elastic securing system.

Head and foot reducing cords allow for a quick, secure casualty fit that helps minimise movement and secondary injury.

DIMENSIONS

Length

Unadjusted 6ft10in / 2m 8cm

Adjusted 4ft 10in / 1m 47cm

Width (Max) 38in / 96cm

Maximum Load

660lbs / 300kg

SIZE PACKED

Length 22^{1/2} in / 56cm

Width 10^{1/2} in / 26cm

Weight 6.6lbs / 3kg
