SMART EQUIPMENT™

simple triage in practice

SMART TRIAGE PAC

The **Smart Triage Pac** gives the ultimate practical solution to effective on scene triage.

By holding the key triage equipment, it initiates a systematic and thorough response, allowing for the rapid triage of adults and children at any scene, which has proven invaluable in enhanced control.

SMART TAG®

The **Smart Tag®** is the most comprehensive all risk Triage Tag available. Highly visible in all conditions, its unique folding design saves time during triage.

SMART TAPE

The **SMART TAPE™** allows rapid, safe, evidence based triage of children at the scene and thereby maximises the pediatric resources available.

By relating a child's length to their normal physiological values the **SMART TAPE™** is unique in providing an age adapted triage algorithm.

Usable in low light, this pocket sized tape is tough enough to be reused time again in the worst conditions.
