(Sold Separately) Set of 4**

EASY TO CARRY
SLED ROLLS UP AND FITS
INTO COMPACT BAG WITH
SHOULDER STRAP

KEY BENEFITS

- + LEAVE YOUR COT AT THE DOOR
- + NO LIFTING required
- + Stairwell braking system reduces your risk of back injury
- + Ideal for tight spaces, single and multi-story buildings and homes
- + Bariatric versions available for larger, heavier calls
- + Excellent for difficult terrain
- + Decon capable
- + Cot compatible

ANOTHER MED SLED SUCCESS STORY...

In 2009, our funeral home made at least a dozen removals that weighed from 350 – 500 lbs. December, 2009 we purchased a Bariatric Med Sled First Call. A funeral home called and asked to borrow our Bariatric Med Sled First Call because they had a 637 lb. deceased who was in a small Cape Cod style house. Firemen suggested cutting out the outside wall of the house in order to remove the deceased. The Med Sled made it relatively easy for us to get him off the bed, through a narrow hallway and out the front door. If we didn't have the Med Sled, we would not have been able to accomplish this and the Firemen would probably have ruined the home in the process. On this removal alone, the Med Sled paid for itself in full.

- Bob DuPont, DuPont Funeral Home, Bristol, CT
