

# Electric Baby Bath

## Electric Baby Bath MEB-F44303.HC

An electric baby bath is an essential addition to any hospital setting, offering numerous benefits for both infants and healthcare professionals. Its automated features streamline the bathing process, allowing nurses to focus on the infant's care and comfort. Additionally, the ergonomic design promotes proper handling, reducing physical strain on staff and enhancing workflow efficiency.

By incorporating electric baby baths, hospitals can elevate the quality of neonatal care, providing a safe, soothing, and hygienic bathing experience for the youngest patients.

- ***Electric Height Adjustability***  
Easily adjust the height with smooth Hi-Lo controls to ensure baby safety and caregiver comfort.
- ***Ergonomic Handles***  
Designed for safe patient handling, creating a safer environment for both baby and staff
- ***Detachable Battery Pack***  
Eliminates cords, creating a safer workspace and extending the bath's operational life.
